

## Manifold Rubber

### For a Quad Bike

I get asked to glue many things when I'm at a festival. Here is something new!

A Quad Bike Intake Manifold Rubber. I'm not one for engines (that's what mechanics are for), but rubber is rubber and according to the client, the temperature will not be a problem either. Satlon 105 starts getting soft at 145 degrees by the way.

*Satlon 105 starts activating under pressure. Oh, and do you see the glue on my fingers?*

*Do you have any questions? Then ask Dawie v/d Walt  
on 081 213 4148*

Because as of the 10<sup>th</sup> Jan 2013, it was still going strong.  
The Manifold rubber was glued on the  
04<sup>th</sup> Jan 2013.
